## Python & MariaDB 연동

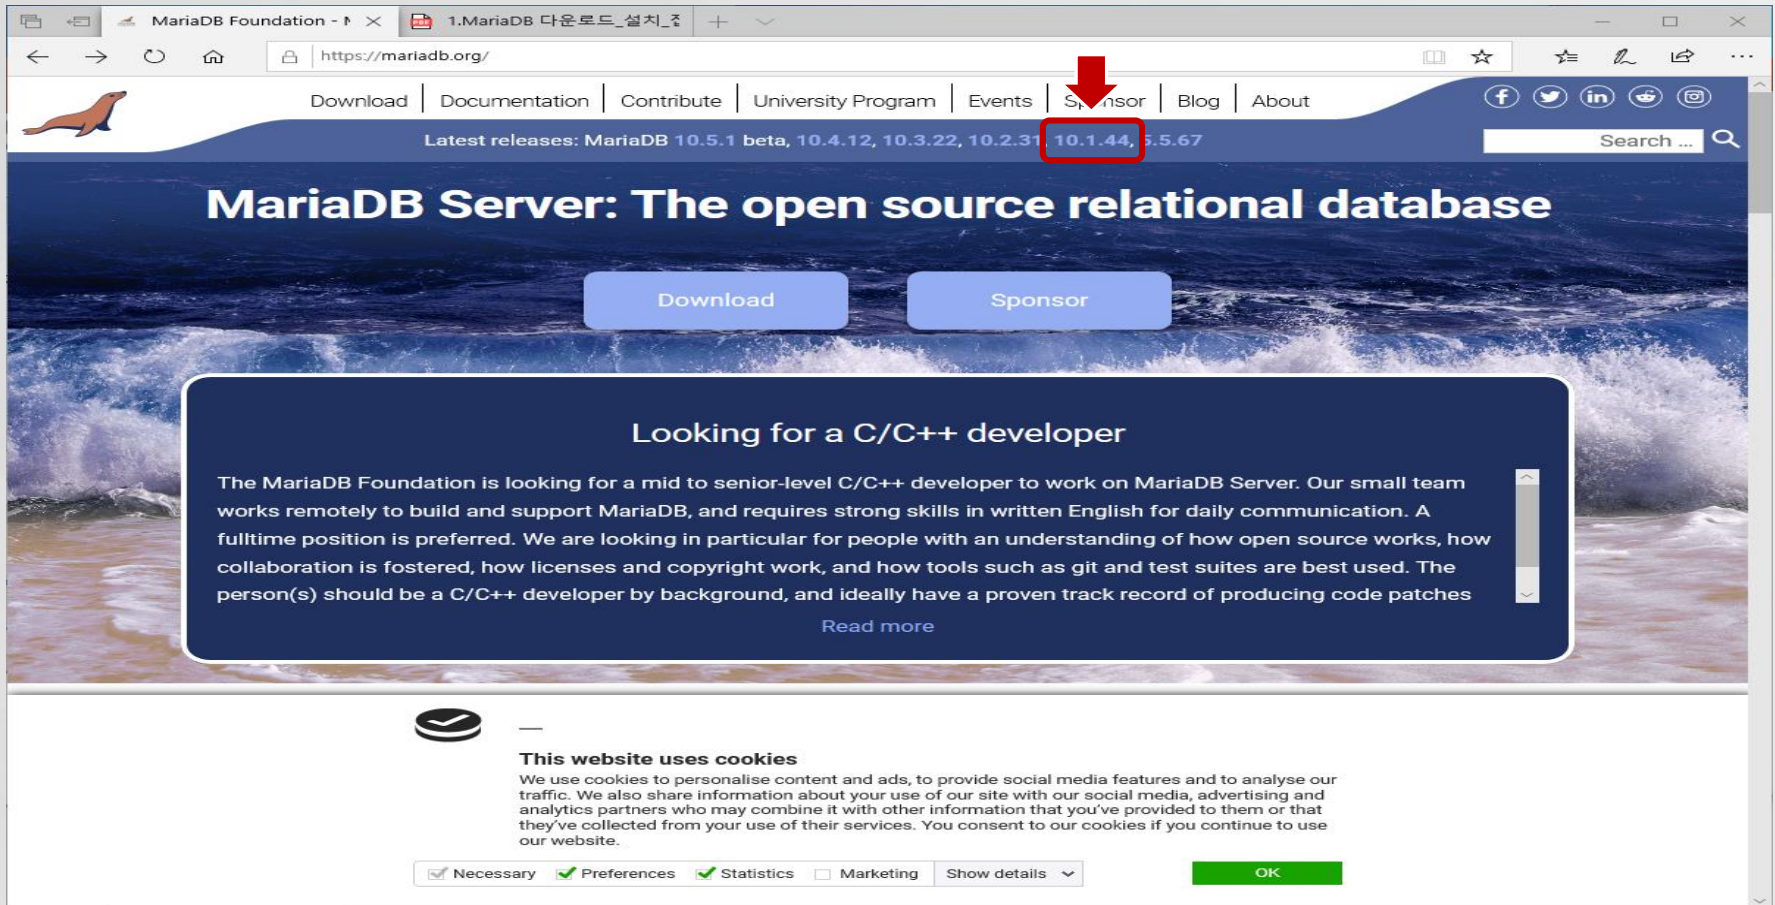

작성자 : 김진성

# 목차

1. MariaDB 다운로드&설치
2. MariaDB 드라이버 다운로드&설치
3. Import 및 MariaDB 연동 환경설정

# 1. MariaDB 다운로드 & 설치

<https://mariadb.org/>

The screenshot shows the MariaDB Foundation website. The browser's address bar displays <https://mariadb.org/>. The navigation menu includes links for Download, Documentation, Contribute, University Program, Events, Sponsor, Blog, and About. A red arrow points to the 'Sponsor' link, which is highlighted with a red box. Below the navigation menu, the text 'Latest releases: MariaDB 10.5.1 beta, 10.4.12, 10.3.22, 10.2.31, 10.1.44, 5.5.67' is visible. The main heading reads 'MariaDB Server: The open source relational database'. Below this, there are 'Download' and 'Sponsor' buttons. A large dark blue box contains a job posting titled 'Looking for a C/C++ developer'. At the bottom, there is a cookie consent banner with a 'This website uses cookies' message and a green 'OK' button.

Latest releases: MariaDB 10.5.1 beta, 10.4.12, 10.3.22, 10.2.31, **10.1.44**, 5.5.67

## MariaDB Server: The open source relational database

[Download](#) [Sponsor](#)

### Looking for a C/C++ developer

The MariaDB Foundation is looking for a mid to senior-level C/C++ developer to work on MariaDB Server. Our small team works remotely to build and support MariaDB, and requires strong skills in written English for daily communication. A fulltime position is preferred. We are looking in particular for people with an understanding of how open source works, how collaboration is fostered, how licenses and copyright work, and how tools such as git and test suites are best used. The person(s) should be a C/C++ developer by background, and ideally have a proven track record of producing code patches

## MariaDB is free and open source software

The MariaDB database server is published as free and open source software under the General Public License version 2. You can download and use it as much as you want free of charge. *All use of the binaries from mariadb.org is at your own risk as stated in the GPLv2.* While we do our best to make the world's best database software, the MariaDB Foundation does not provide any guarantees and cannot be held liable for any issues you may encounter.

The MariaDB Foundation does not provide any help or support services if you run into troubles while using MariaDB. Support and guarantees are available on commercial terms from multiple [MariaDB vendors](#). There are also many resources you can use to [learn MariaDB](#) and support yourself or get peer support online.

## Supported and certified

**binaries available from commercial vendors**  
<https://downloads.mariadb.org/interstitial/mariadb-10.1.44/winx64-packages/mariadb-10.1.44-winx64.msi/fro>

There multiple MariaDB vendors that provide

## Downloads Source, Binaries, and Packages

To show only the files you want, use the checkboxes in the sidebar. For other MariaDB releases, click on ["View All Releases"](#). For faster downloads choose a mirror close to you.

### MariaDB 10.1.44 Stable 2020-01-28

[Release Notes](#)[Changelog](#)[View all releases](#)

Affordable, enterprise class product support, professional services, and training for your MariaDB database is available from the MariaDB Foundation's release sponsor, MariaDB Corporation. To learn more about them and their services for MariaDB, visit their [website](#), or email MariaDB Corporation at [sales@mariadb.com](mailto:sales@mariadb.com).

### Operating System

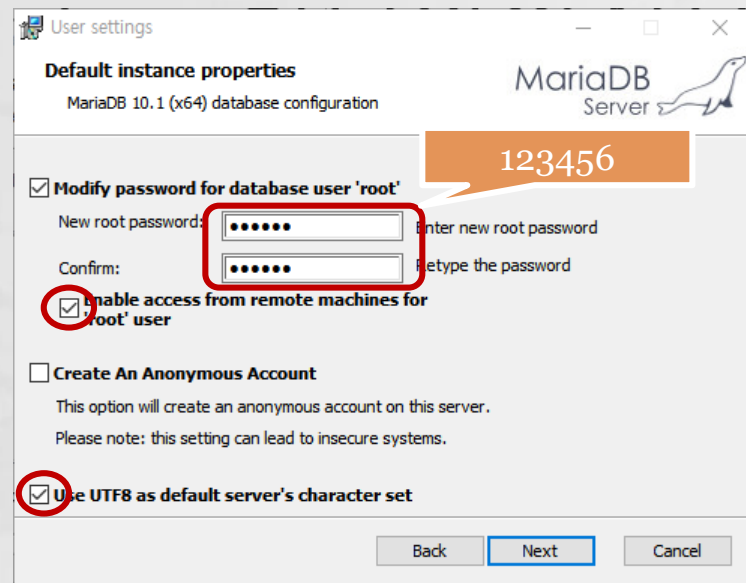

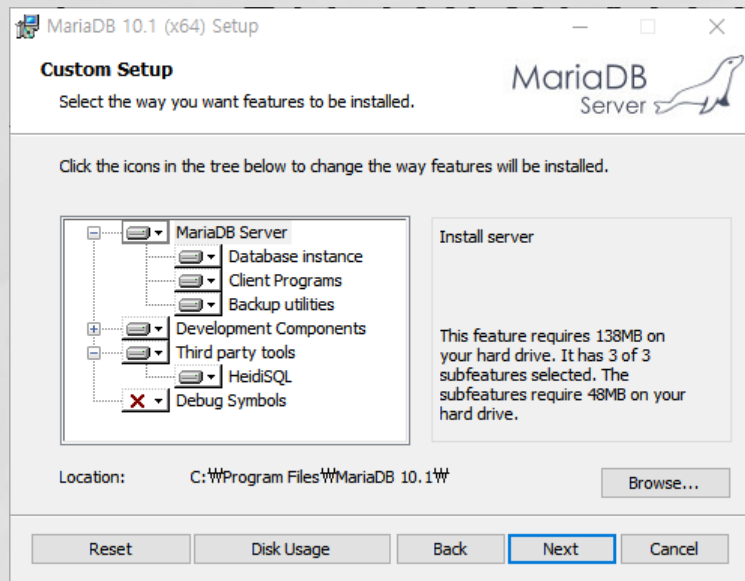

- ☐ DEB Package
- ☐ Generic Linux
- ☐ RPM Package
- ☐ Source Code
- ☐ Windows

### Package Type

- ☐ MacOS pkg
- ☐ DEB Package
- ☐ RPM Package
- ☐ MSI Package
- ☐ ZIP file
- ☐ source tar.gz file
- ☐ source zip file
- ☐ gzipped tar file

# 설치

Database settings

**Default instance properties**  
MariaDB 10.1 (x64) database configuration

☒ **Install as service**  
Service Name:

☒ **Enable networking**  
TCP port:

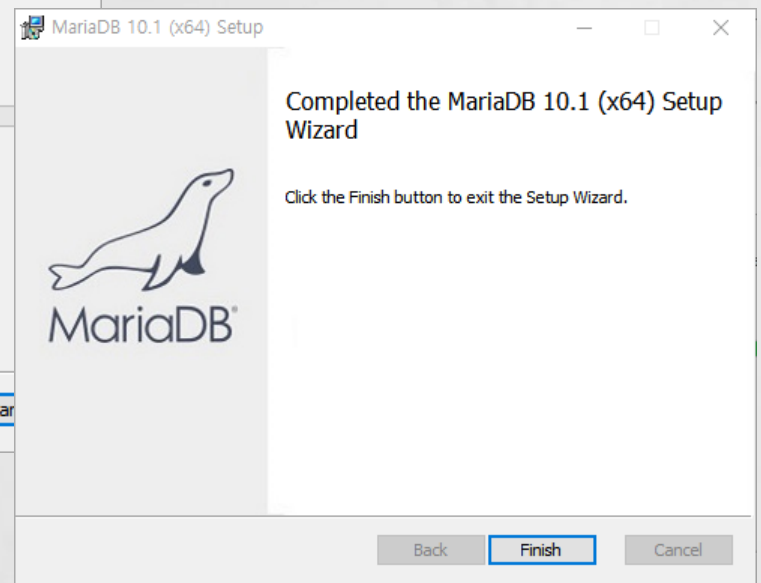

☒ **Optimize for transactions**  
(Uses transactional storage engine and "strict" SQL mode)  
Buffer pool size:  MB

MariaDB 10.1 (x64) Setup

**MariaDB 10.1 (x64) setup**  
Submit usage information

☐ **Enable the Feedback plugin and submit anonymous usage information**  
Monty Program has created a Feedback plugin for MariaDB which, if enabled, collects basic anonymous statistical information. This information is used by the developers to improve MariaDB. Enabling this plugin is an easy way to help with MariaDB development. Collected statistics, and more information on the plugin, can be viewed at [http://mariadb.org/feedback\\_plugin](http://mariadb.org/feedback_plugin)

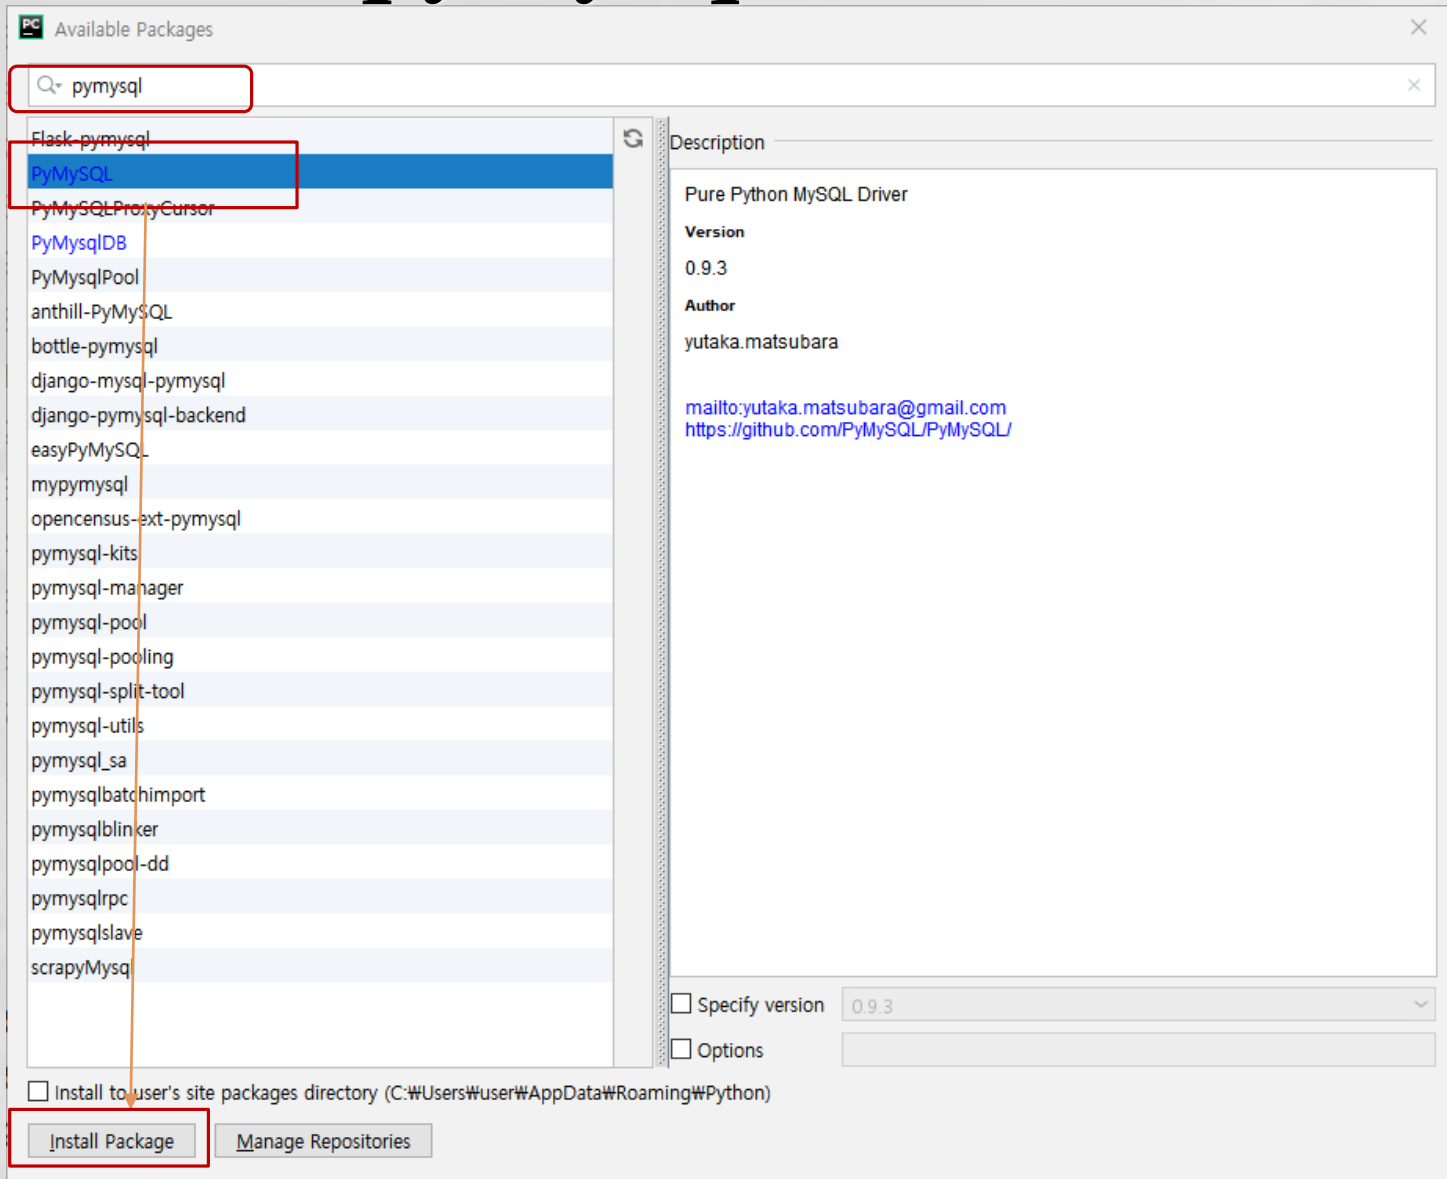

## 2. MariaDB 드라이버 다운로드&설치

- Driver : 프로그램에서 DB를 연결시키는 역할
- 프로그램의 유형에 따라서 드라이버 다름
- Mysql의 드라이버를 그대로 사용
  - Python 전용 드라이버 : python 프로그램과 DB 연동

# pymysql 설치

### 3. 라이브러리 import 및 DB 연동 테스트

```
import pymysql

config = {
    'host' : '127.0.0.1',
    'user' : 'scott',
    'password' : 'tiger',
    'database' : 'work',
    'port' : 3306,
    'charset' : 'utf8',
    'use_unicode' : True}

try :
    # db 연동 객체
    conn = pymysql.connect(**config)
    # sql 문 실행 객체
    cursor = conn.cursor()

    sql = "select * from goods"
    cursor.execute(sql)

    dataset = cursor.fetchall()
    for row in dataset :
        print(row)

except Exception as e :
    print('db error :', e)
    conn.rollback()
finally:
    cursor.close()
    conn.close()
```
